***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

***Information Disclosure Statement***

The Information Disclosure Statement under 37 C.F.R. 1.97 has been received and reviewed. However, the information disclosure is not deemed to be pertinent over the prior art of record.

***Claim Rejections - 35 USC § 112***

2. Claim 1 is being rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 6, the terminology "...predetermined concentration..." is being considered vague and indefinite. Please correct.

A claim is indefinite where it specifies "predetermined" temperatures, etc..., when "predetermined" according to applicant's (or applicants') definition, merely means determined before hand. See *Seagrams & Sons Inc., vs Mattell*, 84 U.S.P.Q. 180. Therefore, the claim(s) is\are unpatentable under 35 U.S.P.Q. 112 second paragraph.

The use of "predetermined" reads on a nebulous mental step conducted prior to the manipulative steps of the claimed invention, hence rendering the present process claims unclear in meaning and scope. If applicant wishes to patent detailed controls over the recited process, they must be positively recited.

Art Unit: 1722

3. Claim 1 recites the limitation "...dopant..." in line 6. There is insufficient antecedent basis for this limitation in the claim. Please insert the word —a— before the word "dopant" for proper antecedence.

***Allowable Subject Matter***

4. As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

5. Claims 2-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. The following is a statement of reasons for the indication of allowable subject matter: The most relevant prior art of reference is that which was submitted by the applicants. However, it does not teach nor fairly suggest singularly or in any combination thereof a method for forming a silicon epitaxial layer comprising the steps of: cleaning the surface of a silicon substrate having a dopant of predetermined concentration doped therein with mixed plasma comprising an etching gas containing fluorine and hydrogen or deuterium; and forming a silicon epitaxial layer on the cleaned surface of the silicon substrate.
